# Bournemouth AND ITS INTERNATIONAL FLYING WEEK.

A GUIDE TO THE MEETINGS

By G. H. B. B.

THE first of the flying week is the opening ceremony, which will take place on Monday, June 10th, at 10.30 a.m. The ceremony will be held at the Bournemouth Municipal Stadium, and will be presided over by the Mayor of Bournemouth, Mr. J. H. B. B. The ceremony will be a most interesting one, and will be well worth watching.

Many of the people who are working on the new building at the University of California.

The new building at the University of California is a very large and modern structure. It is being built on a hillside and is surrounded by a fence. The building has a long, low profile with a series of vertical supports. It is a very interesting sight and is a good example of modern architecture. The people who are working on it are very busy and are doing a great job. The building is a very important part of the university and will be a great asset to the school. It is a very nice building and is a good example of what can be done with modern architecture. The people who are working on it are very busy and are doing a great job. The building is a very important part of the university and will be a great asset to the school. It is a very nice building and is a good example of what can be done with modern architecture.

the 1960s, when the first of the major outbreaks of the disease occurred. The disease was first reported in the United Kingdom in 1966, and since then it has spread to many other countries, including the United States, Canada, and Australia. The disease is caused by a virus, and is transmitted by mosquitoes. The symptoms of the disease are fever, headache, and muscle pain. In some cases, the disease can be fatal.

The disease is a major public health problem in many parts of the world. It is particularly dangerous for children and the elderly. The disease is also a major problem for the military, as it can spread rapidly among troops in the field.

# U.S. NAVY REPORTS LOSS OF 100,000 TONS

WASHINGTON, May 1.—The U.S. Navy today reported that it had lost 100,000 tons of shipping in the Pacific Ocean, the largest loss since the attack on Pearl Harbor. The loss was the result of a series of attacks by Japanese submarines and surface ships on U.S. merchant ships and naval vessels in the Pacific. The Navy said that the loss included 10 merchant ships and 10 naval vessels, with a total tonnage of 100,000 tons. The loss was the result of a series of attacks by Japanese submarines and surface ships on U.S. merchant ships and naval vessels in the Pacific.

# U.S. NAVY REPORTS LOSS OF 100,000 TONS

WASHINGTON, May 1.—The U.S. Navy today reported that it had lost 100,000 tons of shipping in the Pacific Ocean, the largest loss since the attack on Pearl Harbor. The loss was the result of a series of attacks by Japanese submarines and surface ships on U.S. merchant ships and naval vessels in the Pacific. The Navy said that the loss included 10 merchant ships and 10 naval vessels, with a total tonnage of 100,000 tons. The loss was the result of a series of attacks by Japanese submarines and surface ships on U.S. merchant ships and naval vessels in the Pacific.

## NOVEL MACHINES AT BUREAU OF AERONAUTICS

WASHINGTON, May 1.—The Bureau of Aeronautics today announced that it had received a number of novel machines from private inventors. The machines were designed for use in the development of new aircraft. The Bureau said that the machines included a number of new types of engines, propellers, and other components. The Bureau said that the machines were designed for use in the development of new aircraft.

# THE GREAT WHIRLING TABLE AT BARNOW. AN EXAMPLE OF MODERN ENGINEERING

Close-up view of the mechanism of the Great Whirling Table at Barnow.

The Great Whirling Table at Barnow is a unique piece of engineering, designed to test the strength of materials under centrifugal force. It consists of a large, horizontal, circular table supported by a central vertical column. The table is capable of rotating at high speeds, and various mechanical components are attached to its surface to simulate the stresses and strains experienced by aircraft parts in flight.

The table is driven by a powerful motor, and the speed of rotation can be controlled by a hand crank. The entire apparatus is built of heavy steel, and the table itself is made of a special alloy of steel and nickel. The table is used to test the strength of various parts of aircraft, such as wings, fuselages, and engines, and is considered one of the most important pieces of equipment in the testing of modern aircraft.

The Great Whirling Table at Barnow, showing the entire structure and the large, horizontal, circular table.

## **SHIP NEWS.**

### **Arrival and Departure of the National Ship.**

The National Ship, *U.S.S. Albatross*, arrived at the port of San Francisco, California, on Monday, October 14, 1941, at 10:30 a.m. The ship was en route from the port of San Francisco, California, to the port of San Francisco, California.

The ship was en route from the port of San Francisco, California, to the port of San Francisco, California.

### **To San Francisco.**

## THE PORTWAY AIRPLANE.

THE PORTWAY AIRPLANE, designed by the Portway Aircraft Corporation, is a single-engine, single-seat, high-wing, tail-dragger, with a fixed landing gear. It is a light aircraft, weighing about 1,000 lbs. empty, and is capable of flying at a speed of 100 m.p.h. It is a very simple and easy to fly aircraft, and is suitable for use as a trainer or for private flying.

It has a very simple and easy to fly design, and is suitable for use as a trainer or for private flying. It is a very simple and easy to fly aircraft, and is suitable for use as a trainer or for private flying. The "Studio" set at WABC-TV, New York City, is a typical example of a modern news studio set. The set is designed to be functional and aesthetically pleasing, with large windows providing a view of the city and natural light.

### WATER BURY

#### WATER BURY, CONNECTICUT

The waterbury plant is a small, bushy, perennial plant, growing to a height of 2 feet. It has a thick, woody stem, and the leaves are small, oval, and dark green. The flowers are small, white, and appear in clusters at the ends of the stems. The fruit is a small, round, red berry.
